ARMED FORCES • INTRODUCTION

FOOD SERVICE FOR THE MISSION

Food solutions for collective meals in military units and support facilities.

Meals in the military context

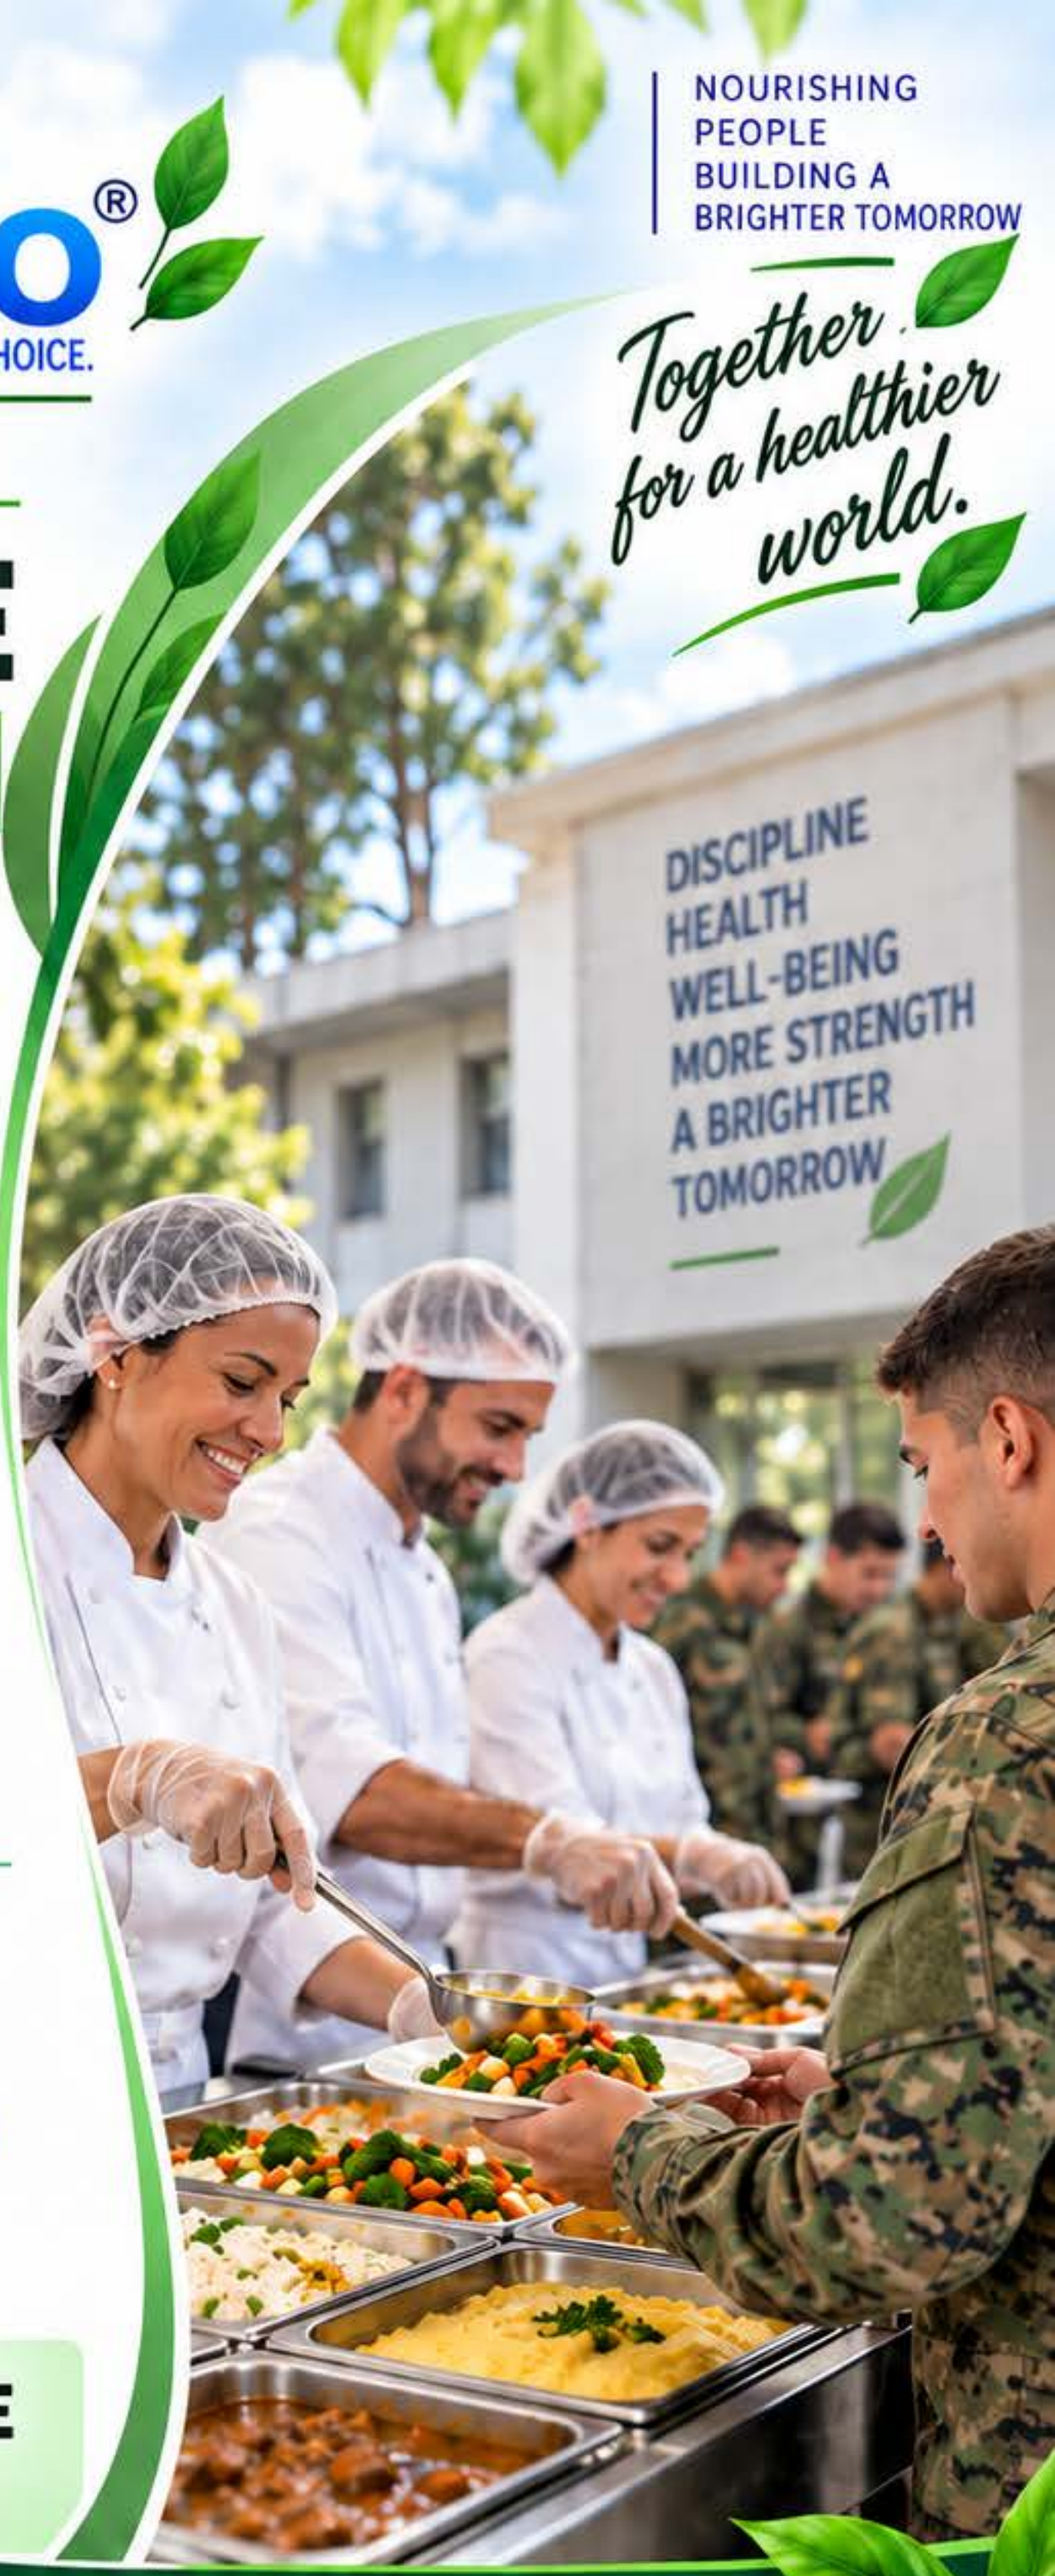

The organisation of meals is part of the daily operations of military units. Planning must consider the number of personnel, service times and the conditions at each location.

From preparation to service

Defining quantities, menus, equipment and teams helps to organise supply and preparation. Proper storage, hygiene and clear preparation instructions for each product should guide the entire process.

Tailored planning for each unit

Menus and the service must meet the nutritional needs of military personnel, as well as dietary restrictions and operational conditions. Coordination with the unit leaders enables supply to be adjusted and waste to be reduced.

PLAN • PREPARE • SERVE

Institutional Products to integrate military food services.

FEEDING PEOPLE BUILDING BRIGHTER TOMORROWS

ARMED FORCES • INTRODUCTION

FOOD SUPPLY FOR THE ARMED FORCES

The organisation of meal provisioning is integral to the daily operation of military units and their support structures.

Supply must take into account the number of personnel, service schedules, rations and the storage and preparation conditions at each unit.

ALI100H₂O institutional products can support military food services, working in coordination with those responsible for supply and food preparation.

Images for illustrative purposes.

OBJECTIVES OF THE FOOD SERVICE

1. Support the organisation of meals in military units.
2. Plan the supply according to the number of personnel and service schedules.
3. Adjust quantities and supply frequency to the needs of each unit.
4. Coordinate rations with those responsible for food service.
5. Oversee the storage, preparation and distribution of meals.
6. Consider the composition of products, allergens and specific dietary requirements.
7. Check the availability of drinking water, equipment and serving conditions.
8. Follow storage, hygiene and preparation instructions for each product.
9. Monitor consumption and adjust supplies to reduce waste.

INSTITUTIONAL PRODUCTS • ALI100H₂O

FOOD DEHYDRATION

Discover the process. Understand the advantages.

ALI100H₂O
NUTRITIOUS BY NATURE, ESSENTIAL BY CHOICE.

From nature's ingredients to your table

01 PRESERVATION

Dehydration removes some of the water from food and reduces the water available for the growth of bacteria, yeasts and moulds. It is a widely used preservation method; safety depends on the process, packaging and storage conditions.

02 HOW IT WORKS

During thermal drying, water in solid or liquid foods evaporates, usually below boiling temperature. Temperature, humidity and air circulation are controlled. Air transfers heat to the food and carries water vapour away.

03 NUTRITIONAL QUALITY

The retention of nutrients depends on the food and the drying conditions. Minerals, such as selenium, potassium and magnesium, are generally well preserved; vitamins, including vitamin A, may be lost. The structure and texture can also change.

04 LACTIC CULTURES

Lactic acid bacteria can be sensitive to heat. Their preservation requires specific and controlled processes, such as freeze-drying; survival also depends on the strain and the conditions used.

05 STORAGE AND TRANSPORT

Many dried foods can be stored without refrigeration before preparation, according to the label. Suitable packaging and a cool, dry place help to preserve the product and can reduce logistics costs.

06 LESS WEIGHT

Removing water reduces the weight and makes transport easier. A food with 90% water can, in theory, be reduced to about one tenth of its initial weight if that water is removed. The result varies with the residual moisture content.

07 REHYDRATION

Adding water allows many dehydrated foods to be reconstituted. The speed and result depend on the porosity, drying method and preparation. The original volume and texture are not always fully restored.

ALI100H2O®

NUTRITION BY NATURE, ESSENTIAL BY CHOICE.

SUPPORT FOR ARMED FORCES

Safe and nutritious food for those who protect our world

DEHYDRATED FOOD SOLUTIONS FOR MISSIONS, OPERATIONS AND FIELD SUPPORT

01 EFFICIENT LOGISTICS

Dehydrated foods are lightweight, compact and easy to transport, ideal for operations in any environment.

02 LONG SHELF LIFE

High durability, reduces the need for refrigeration and ensures continuous supply under demanding conditions.

03 QUICK PREPARATION

Nutritious meals ready in minutes, using only potable water, even in the field.

04 HIGH NUTRITIONAL VALUE

Balanced and tasty meals that provide the necessary energy for physical and mental performance.

05 WIDE RANGE OF PRODUCTS

Soups, rice, pasta, polenta, dairy drinks, flavoured drinks, porridge and much more.

06 WASTE REDUCTION

Optimised packaging and less food waste, contributing to more sustainable operations.

07 SUPPORT IN CRISIS SITUATIONS

An ideal solution for humanitarian missions, military operations, civil protection and support to populations affected by disasters.

08 A RELIABLE PARTNER

ALI100H2O – a committed partner to food security for Armed Forces and the communities they support.

Feeding those who serve a better world.

ALI100H2O

Nutritious by nature, essential by choice.

PREPARATION FOR 1 KG

RISOTTO

1. 
Bring **4 litres** of water to the boil.

2. 
Add **1 kg** of the product to the boiling water, stirring well until completely dissolved.

3. 
Once it returns to boil, cook over low heat for **20 to 25 minutes,** with the pan covered.

4. 
Ready to serve.

SOUP

1. 
Dissolve **1 kg** of the mixture in **8 litres** of lukewarm water and stir well.

2. 
Bring to the boil over high heat.

3. 
Once boiling, reduce the heat and cook for **15 minutes,** stirring constantly.

4. 
Ready to serve.

FLAVOURED DRINK

1. 
Dissolve **1 kg** of the product in **10 litres** of cold or iced water (as preferred).

2. 
Stir well until completely dissolved.

3. 
Ready to serve.

DAIRY DRINK

1. 
Dissolve **1 kg** of the product in **5 litres** of hot, cold or iced water (according to your preference).

2. 
Stir until completely dissolved.

3. 
Ready to serve.

Simple. Nutritious. Delicious.

www.ali100h2o.com | geral.ali100h2o@gmail.com | vb.ali100h2o@gmail.com

ALI100H2O

Nutritious by nature, essential by choice.

PREPARATION FOR 1 KG

PORRIDGE

1

Dissolve **1 kg** of the product in **3 litres** of cold water and mix well.

2

Add a further **3 litres** of hot water and place over the heat.

3

Once boiling, cook over low heat for **2 minutes,** stirring constantly.

4

Ready to serve.

PASTA

1

Add the sauce sachet **(340 g)** and pasta packet **(660 g)** to **4 litres** of water. Mix well until the sauce has completely dissolved.

2

Heat until boiling.

3

Cook over low heat for approximately **15 minutes,** stirring constantly.

4

Ready to serve.

POLENTA

1

Dissolve **1 kg** of polenta in **5 litres** of water.

2

Bring to the boil over high heat.

3

Reduce the heat and cook for **5** to **10 minutes.**

4

Serve immediately.

Simple. Nutritious. Delicious.
